**WHAT EVS SYMPOSIUMS MEAN FOR SPECIALISTS
Testimony**

Dr. IR. Peter VAN DEN BOSSCHE is a researcher and lecturer at the Erasmus Hogeschool Brussel and the Vrije Universiteit Brussel. He has been active in the electric vehicle field for many years and will be attending EVS-21 to present a lecture paper on the evolution of international standardisation for electrically propelled vehicles, as well as a dialogue paper on simulating the impact of clean vehicle introduction in city traffic. A regular attendant to the EVS symposia, he considers them as the premier technical and scientific forum in the field, with opportunities to meet with colleagues worldwide, to keep aware of the latest technical evolutions and to exchange ideas.
