The research

A symposium proposing a series of scientific, technical and business lecture and dialogue sessions from experts around the world to promote viable solutions for sustainable mobility. A perfect occasion to discover the current topics: batteries and energy storage, the technological advancement of fuel cells and hybrid vehicles, global warming... (amongst others)

The show

An assembly of international exhibitors: energy providers, equipment manufacturers, professional automotive, and vehicle manufacturers (Peugeot, SVE, Dassault Heuliez, Citroën, SAFT, Honda, Toyota, General Motors, DaimlerChrysler) as well as smaller but nonetheless important exhibitors will reveal their new products.

The sensation

The Ride & Drive where you can try out licensed vehicles on the Grand Prix Circuit, prototypes around the Port of Monaco, and last but not least, two-wheelers behind the Grimaldi Forum.

The 21st Electric Vehicle Symposium (EVS 21), held in Monaco from April 2 to 6, will be the electric vehicle event of reference for the year 2005. It will evaluate the latest technologies in electric transportation and give you the unparalleled opportunity to meet with automobile constructors, national and local political leader and researchers who advocate to propel the vehicle industry to a new life after petrol. Come and seize the opportunity to discover vehicles not yet commercialised in France.
